Garden City, NY 11530**

Introduction

The Incorporated Village of Garden City, New York (the “Village”), is currently seeking proposals from qualified individuals and entities authorized to do business in the State of New York to provide professional engineering services related to improvements to the 7th Street Crossing located approximately 300 feet west of Franklin Avenue (near the street address 167 7th Street).

The Village aims to receive a full set of construction plans and specifications for the purpose of bidding the construction of the selected improvement for the identified crosswalk.

The Village is committed to a policy of equal opportunity and does not discriminate against Vendors on the basis of age, sex, sexual orientation, race, color, creed, religion, ethnicity, national origin, disability, marital status, familial status, veteran status or any other basis protected under federal, state and local laws, regulations and ordinances.

Anticipated Proposal Schedule

RFP Issue Date:	December 12 th , 2022
Proposal Due Date:	January 5 th , 2023
Oral Presentation (if necessary):	TBD
Award Date:	TBD

*Dates indicated above are subject to change at the sole discretion of the Village.

Background

7th Street is classified as a minor arterial in the Central Section of the Village. It is approximately one thousand two hundred (1,200) feet long between Franklin Avenue and Hilton Avenue. This section of 7th Street has mostly commercial land uses along the south side of the street and both multi-unit residential and some commercial on the north side of the street. There are three mid-block crossings. The eastern most is the site of the proposed project.

At this location the roadway cross section is (~45' wide) with main travel way (30' wide) with one (~16 feet wide) lane in each direction. There is a curb-side parking lane (~8') in each direction. There is curbing and sidewalks on each side of the travel way. There is access to the driveways to parking in the

rear of the buildings on each side. An aerial view of the project area is included in Appendix C of this RFP.

This location was identified through a Traffic Calming Planning Study in 2021 as a place to improve pedestrian safety. The study recommended bump outs as a way to shorten the crossing distance and make pedestrians more visible to motorists. The bump outs will also discourage parking in the crosswalk. Following this, the Traffic Commission and Board of Trustees passed a resolution to design a raised crosswalk or speed table to further calm traffic and improve pedestrian safety at this crosswalk.

The specific responsibilities and obligations of the Vendor (also referred herein as "Firm", "proposing Firm", "Proposer", "Party" or "Respondent") are proposed to include, but not necessarily be limited to, those outlined below.
